

MARS, PLUTO and VULCAN

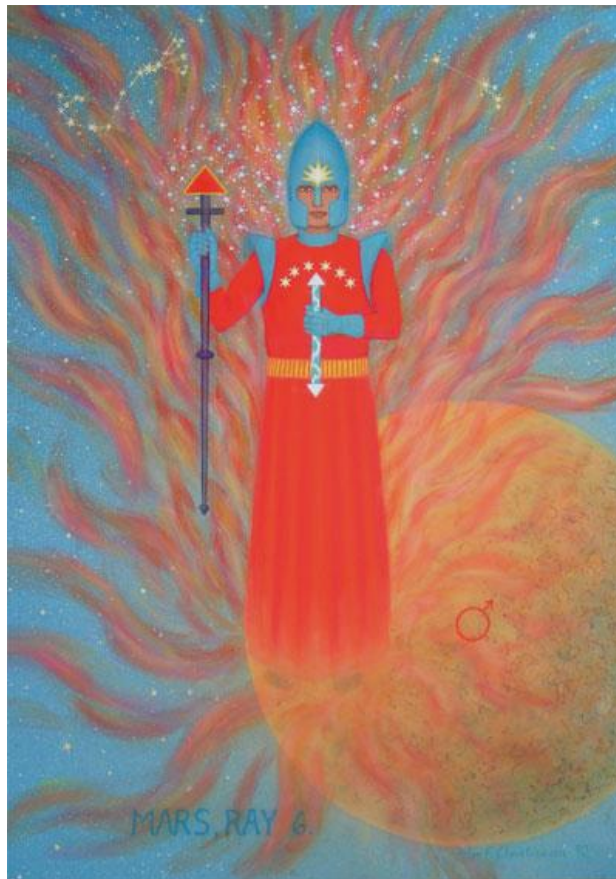

Three pioneer planets, triggers of revolution and transformation in the World and within the human being.

Planets and stars are not only balls made of stone and gas. They are created and maintained by Gods Who radiate Their purposes and energies mutually, from these vantage points.

Energies from the Signs and other fixed stars get attracted by planets according to their levels of development, harmonics and old relations between these "Heaven People". Such Beings through the human stage, eons ago.

Planets are also homes for many smaller life forms, and Schools for human-like intelligences living on the surface or on the inside. Planets are hollow.

MARS

Mars is the School for Warriors, the Graduates of the ruddy Fire. They work under the first Aspect, Power, Will. They train those who work along the lines of the destroyer.

It was reckoned that the splitting part of the Mars power would fade out after the World wars. But renegades schemed a plan which became more and more evident, of the devise: Divide and Rule.

Again the grossest power of Mars plus fanaticism were mobilized big time, but when sufficiently enough has been destroyed, the more subtle energies of Pluto and Vulcan will strengthen (as of now), and transformation can proceed rather quickly on Earth.

PLUTO

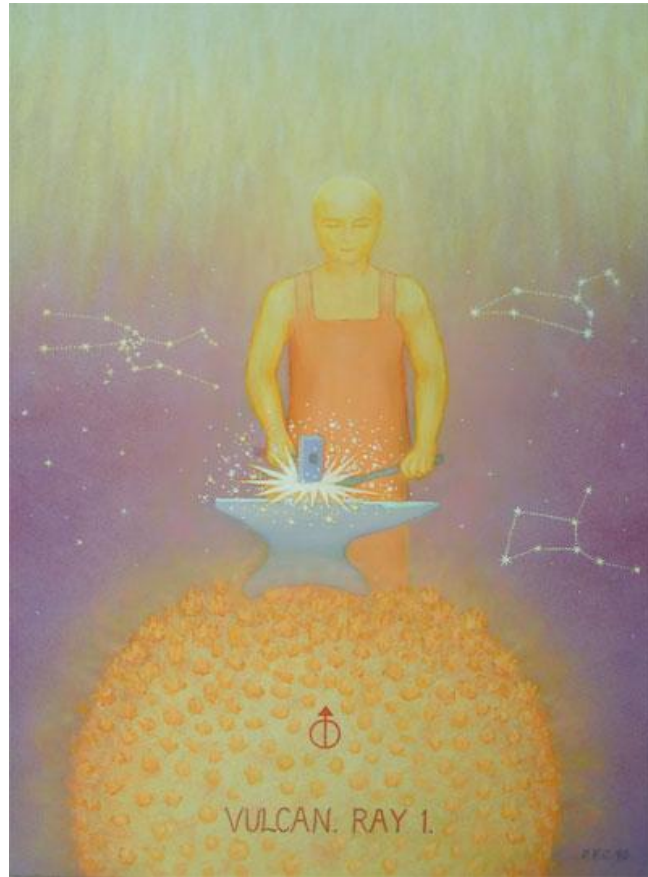

Pluto is an esoteric planet on Ray 1, a God wielding dark energies which penetrate and expose corruption and the like.

These energies destroy and heal. Pluto is a School, too, but details are not given.

Pluto rules the masses and stages the tests for the world disciple. Pluto is getting powerful in this time of transition, the turning point.

VULCAN

Vulcan, another esoteric planet, on the rim of the solar rim, is a more developed Ray 1 planet. The human units of this planetary School are called the Burning Stones. They have a close connection to the mineral kingdom.

The human units on Earth are called the "Living Stones".

This energy of Vulcan has for long been at work on Earth. Here the mineral kingdom is dominant in warfare, as enormous heaps of minerals are being used destructively by the "Living Stones".

Vulcan radiates endurance. It goes into the very depths of the human nature and brings the coarsest obstacles to the surface to be transformed in the light of the soul.
